

Installing the software

Download the Mixly_WIN.7z archive, right-click and decompress it to your local disk. See the online folder:

<http://yourduino.com/docs/MIXLY/>

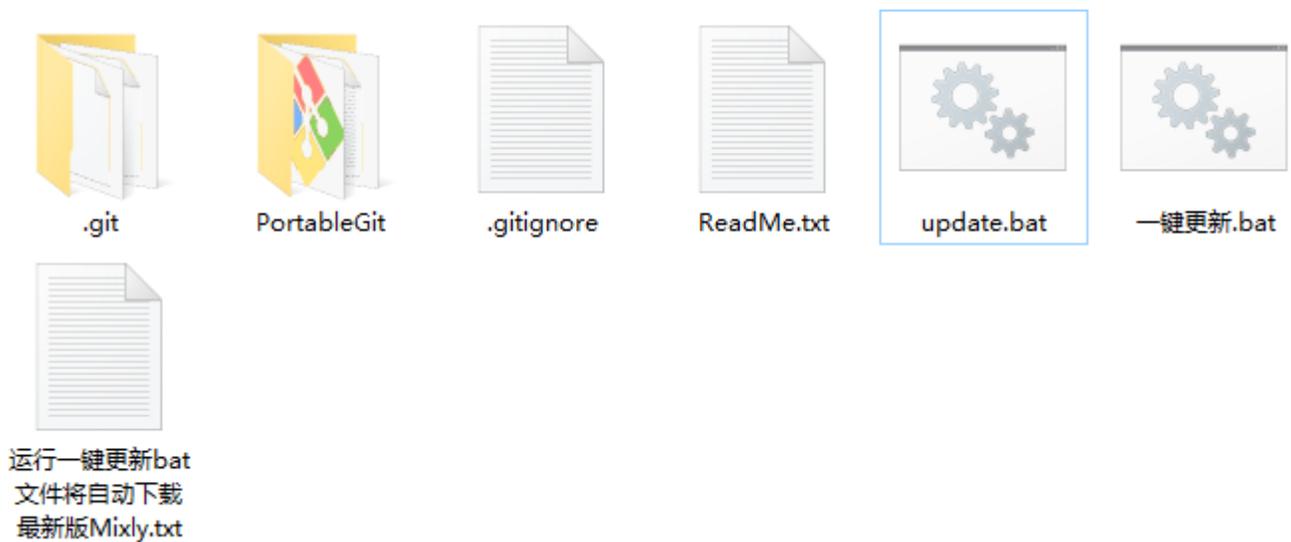

It also has the 7Z decompression software for both 32 and 64 bit Windows. You need to install that to decompress / install the first part of MIXLY.

The following is a translation of the page on mixly.org:

annotation

- It is recommended to decompress to the root directory of the hard disk. like c:\ The path cannot contain Chinese and special characters (such as _ (), etc.).
- Recommended installation path such as C: \Mixly

The directory after extraction is shown in the figure.

The first decompression software contains only the most basic files and cannot be run directly.

You need to run one-click update.bat or update.bat to download the latest version of Mixly software. This will take a LONG time..

After waiting a moment, the update progress is displayed.
